REPORT OF BOARD OF HEALTH

The town of Colebrook experienced a small epidemic of Scarlatina during the past year, with no fatalities and no serious complications. It was confined principally to the younger children, several under school age. Otherwise the general health conditions were about the same as usual.

The Mohawk river has been kept in much better condition than in former years due to the cooperation of the general public.

Through the assistance of the school nurse many infectious skin conditions have been cleared up in very short order in the schools, both in the village and rural schools.
